Early in the process, Jim Koch, director of the Center for Science, Technology, and Society (CSTS) at Santa Clara University (SCU), warmed up to the idea of writing this volume. CSTS funded the conference at SCU in February 2000, “Technological Advance and the Changing Context of Public Policy Justification,” at which the evolving set of contributors gathered. The conference was crucial in making connections and achieving a common focus on the intended themes. The editors are grateful to CSTS for that support, made at the most challenging part of the process: the beginning.

We also wish to thank Santa Clara University for the university grant used to hire Jock Doubleday for a preliminary round of fine copy editing. We thank Wayne Crews for shepherding the manuscript through the submission process and Bihn Chen at SCU for formatting the text.
